MANUFACTORY & WAREROOMS, No. 70 & 72 BARRINGTON STREET,

HALIFAX, N. S.

In consequence of the great demand for our Pianos throughout the Province, and to be prompt with our customers, we have increased our facilities for manufacturing, and hope that we are now in a position to fulfill all orders sent to us at once, for

Grand Square, Oblique or Cottage Pianos,

These instruments are altogether unlike the common Pianos sold in different places in the city, being very strongly made, and having double check action, full metallic plates, with heavy bolts, and put together in a manner that no common Pianos are ever made, it being too expensive.

ACADIA BLACKING & INK COMPANY, HALIFAX, N. S.

Trade "ECLIPSE." Mark.

MANUFACTURERS OF

Paste, Liquid, Dressing and Harness Blackings, Writing, Shoe and Saddlers' Ink, Liquid Glue, Mucilage, &c.

PLEASE OBSERVE! All our manufactures are warranted fully equal in quality to the best articles of their kinds imported. Our prices also are invariably lower, and in some cases the "style of putting up" is decidedly superior to that of any other kind.

With reference to our PASTE BLACKING, please remember, that our Medium size is fully one fifth larger than Mason's so-called "New Medium." We are compelled to make this statement, as the price of the one size has been compared with the other, greatly to our prejudice.

Country Merchants, therefore, in ordering from their city agents, should direct them to send no other kind; and if instructions are not complied with, then order direct from the Company's Agent.

then order direct from the Company's Agent.

N. B.—Cash paid for our own Tin Blacking Boxes, with stamped covers, and also for all kinds clean empty Ink and Blacking Bottles.

THE STAR LIFE ASSURANCE SOCIETY, 48 Moorgate Street, London, E. C.

Invested on Mortgage of Real Property, Government and other securities. To be able to pay all claims, meet all expenses, and at the same time create such a Fund, shows the prosperous nature of the business, and the secure basis on which the Society rests.

90 PER CENT. of the profits are divided amongst the policy holders.

The next Division of Profits will take place in 1869.

£405,000 Sterling have been paid to the representatives of deceased assurers, the value of which to the Widow and Fatherless can never be told.

WHAT IS LIFE ASSURANCE?

It is the exercise of prudence. It secures independence and domestic happiness to the Widow and the Orphan. It affords to persons in every class and in every situation in life, the means to avoid much future misery in their families,

and to render them independent of public or private charity.

Admitting the uncertainty of human life, it behoves every head of a family, as well as all who have others dependent on them for support, to consider the position which his family or dependents would be placed in, supposing he were to DIE to-morrow. The great advantage offered by LIFE ASSURANCE, is the certainty of the family of the deceased Assurer receiving a stated amount, even if his death were to take place the moment after he had paid the first premium. Supposing a person insures his life for £500, he is placed in precisely the same position as if he had deposited £500 in the Bank, for the purposes of his family.

The Directors of the "STAR" have decided to appoint AGENTS throughout

The Directors of the "STAR" have decided to appoint Agents throughout the Provinces of Nova Scotia and New Brunswick, who will receive a liberal remuneration for all business done by them. Applications, accompanied by testimonials, to be made to the General Superintendent of the Nova Scotia Branch, who will be happy to afford every information.

LIGHT HOUSES.

On the Coast of Nova Scotia; The Coast of New Brunswick and the United States in the Bay of Fundy; and at Cape Race, Newfoundland.

Hon. Peter Mitchell, Minister of Marine and Fisheries, Ottawa.

MEAGHER'S BEACH-East side Halifax harbour. A fixed white light, elevated 68 ft. above sea level, and visible 10 miles.

DEVIL'S ISLAND LIGHT-On the S. W. point of Devil's Island, Eastern Passage entrance to Halifax harbour. A fixed red light, to distinguish it from Sambro and Meagher's Beach lights, elevated 45 ft.; visible 8 miles. Octagonal dark brown tower, with a white belt between the bal-

cony and lantern, to distinguish it in day time.

Sambro Island Light—On the S. W side of the entrance to Halifax harbour. A fixed white light, elevated 115 ft. above the sea, visible in clear weather from 20 to 25 miles. White Octagonal Building, Lat. 44° 26' N. Long. 68° 35' W. A fog trumpet has been placed on Sambro Island, in operation during thick or foggy weather. Each blast of five seconds duration, with intervals of 20 seconds, audible 6 to 10 miles in calm weather. In case of accident to the trumpet, signal guns from ships will be answered by the discharge of two 24 paunders in succession.

West from Halifax.

PEGGY'S POINT LIGHT-East point of entrance to St. Margaret's Bay. A fixed red light, about 65 ft. above high water, Square White Building standing about 40 yards from the shore. Lat. 44° 29' N. Long. 63°

CHESTER LIGHT, ON IRON BOUND ISLAND.—Entrance to Mahone Bay. Two fixed white lights, apart from each other 25 feet horizontally, visible from sea from W. S. W. to N. E., elevated 50 feet above high water. Lat. 44° 26' 15" N. Long. 64° 4' 10" W.

CROSS ISLAND LIGHT-Upon the S. E. point of the island. Two lights placed vertically, 44 feet apart, the lower light is Axed; the upper one flashing at intervals of a minute, visible 14 miles. Building red, Lantern painted black. Lat. 44° 19' N. Long. 64° 9' W.

BATTERY POINT LIGHT-At the entrance to Lunenburgh harbour. A fixed white light, visible 12 miles. White square building. This harbour is easy of access, spar buoys are placed in the bay and entrance to the harbour on the Sculpin Hock, Haddock Sheal, Battery Point Shoal, and Head Shoal. In approaching the harbour from seaward the buoy on Sculpin Rock, painted red and black in horizontal stripes, may be left on either hand, giving it a berth of two cable's length. The other buoys are painted black and must be left on the port hand going in.

IBON-BOUND ISLAND LIGHT-Entrance to LaHave River. A bright flash light, of 20 seconds duration, followed by eclipses of 30 seconds. The lantern is on a square white tower, on the southern side of the island.

70 ft. above sea level, visible from all points of approach.

Moser's Island Light-West side of the entrance to LaHave River. A fixed red light, on the S. E. point of the island. Square white building, 58 ft. above sea level, standing 100 ft. from the cliff. Lat. 44° 12' N. Long. 68° 18' W.

PORT MEDWAY HARBOUR LIGHT-On Admiralty Head, West side of the entrance to the port. Square white building, with a black square

Brown Brothers & Co., Importers of Flower, Field and Garden Sceds.

sion.

in the centre of the seaward sides. A fixed white light, 44 ft. above sea level, visible 10 miles. Spar buoys are placed in the channel to Port Medway harbour, on the breaking ledges, Nautilus Rock, corner ground, and edge of flats off Bangs' Point. In passing in from seaward the red buoys must be left on the starboard, and black buoys on the port hand.

LIVEBFOOL LIGHT—South end of Coffin's Island. A revolving light, appearing full at intervals, of two minutes, 80 ft. above sea level. Building ostagonal, in red and white horizontal stripes, visible 16 miles.

FORT POINT LIGHT—Entrance to the inner harbour of Liverpool. A white fixed light, visible from all points of approach, and must be left on the larboard hand when entering the harbour.

LITTLE HOPE ISLAND LIGHT—Off Liverpool. A revolving red light, 40 ft. above high water, attaining its greatest brilliancy every minute. Situated nearly in the centre of the island. Lat. 43° 48′ 31″ N. Long. 64° 47′ 15′ W. The lantern is placed on the top of the keeper's dwelling, which is painted white.

Gull Rock Light.—Off the entrance to Ragged Island harbour. A white fixed light, 51 ft. above sea level. Square white building. Lat. 43° 39' N. Long. 64° 66' W.

SHELBURNE LIGHT—On the S. E. point of McNutt's Island, at the entrance of the harbour. Two white lights vertical—the upper light 100 ft. above sea level, and visible 18 miles; the lower light 38 ft. below the lantern at the top of the building, and visible 10 miles. Building painted black and white in vertical stripes.

Barrington Light—On Baccaro Point, E. side of the entrance to the harbour. A revolving light, bright 15 seconds and dark 25 seconds, elevated 49 ft., visible 12 miles. Square white building, with a black ball on the seaward side.

CAPE SABLE ISLAND LIGHT—A rea fixed light. Octagonal white building. Lat. 43° 27' N. Loug. 65° 36' W. High water at Cape Sable, full and change, at 73 o'clock. Spring tides rise 12 ft., neaps 6 ft.

SEAL ISLAND LIGHT.—The first light on approaching the Bay of Fundy is on the S. point of Seal Island. A fixed white light, 80 feet above high water, and may be seen, when approaching, from any point of the compass, at the distance of 18 or 20 miles. Octagonal white building. The Blonde Rock lies about 3½ miles S. by W. from the light house. Letween this rock and the island there are some dangers; the ground is rocky throughout, and large vessels ought not to attempt passing between them.

PUBNICO HARBOUR LIGHT—On the S. E. side of the entrance to the harbour, about 18 miles northerly of Cape Sable. A fixed white light, 28 ft. above high water, (rise and fall 12 feet.) Square white building, standing 50 fathoms from low water mark.

FISH ISLAND LIGHT—On Big Fish Island, E. side of the entrance to Tusket River. Two fixed horizontal white lights, visible 12 miles.

YARMOUTH I IGHT—On the island of Cape Forchu, West side of the entrance to the harbour. A bright revolving light, 145 ft. above sea level, visible quarter minute and invisible half a minute. Seen in clear weather 18 or 20 miles. Building red and white in vertical stripes. Lat. 43° 48′ N. Long. 66° 09′ W.

CAPE ST. MARY'S LIGHT—East side of entrance to St. Mary's Bay, Digby Co. A revolving light, attaining its greatest brilliancy every minute, and showing alternately red and white faces, 100 ft. above high water. White octagonal building. Lat. 44° 04′ N. Long. 66° 08′ W.

h

WESTPORT LIGHTS—On Peter's Island, at the S. entrance of the E. side of the Bay of Fundy. Two white fixed lights, placed horizontally, to distinguish it from Brier Island Light, 40 feet above high water mark, visible 10 miles, and is intended to lead vessels into Westport, or through Grand Passage. Square white building.

BOAR'S HEAD LIGHT—N. entrance Petite Passage, Bay of Fundy. Alternate flashes, red and white, at intervals of 60 seconds. Square white

milding.

N.S.

BREHM, Soap and Candle Manufacturer,

ROBERT A.

DIGHY GUT LIGHT—On Point Prim, at the entrance of the Gut. A fixed white light, 76 ft. above high water, and visible 18 miles. Build-

ing square, painted red and white vertically.

PORT WILLIAMS LIGHT—Two fixed white lights, 20 ft. apart, perpendicularly, visible from all points of approach. Square white building. Port Williams is distant from Digby Gut Light E. 25 miles; and from Black Rock W. 28 miles.

MARGARETVILLE LIGHT—A red fixed light, visible 10 miles from all points of approach. Building square, painted in white and black horizontal stripes. Margaretville is distant E. 37 miles from Digby Gut Light, and W. 15 miles from Black Rock Light.

BLACK ROCK LIGHT-A white fixed light, 55 ft. above the level of high

water, and visible 12 miles. Square white building.

SPENCER'S POINT —A white fixed light is placed on the top of a building at this point, on the northern shore of Cobequid Bay, near the head of Minas Basin.

PARRSBORO' LIGHT—On the W. side of the entrance to Parrsboro' River.

A fixed white light, 30 ft. above high water, visible 9 miles. Octagonal

white tower, standing close to high water mark on the beach.

HORTON BLUFF LIGHT—A white fixed light, 95 ft. above high water level (rise and fall 40 to 45 ft.), visible in clear weather over the greater part of the Basin of Minas (after passing Cape Blomedon) and above the Five Islands and up Windsor River, until intercepted by the continuation of the Bluff to the southward of it. Square white building, standing 66 feet from the Bluff.

BUANT COAT HEAD LIGHT—The lantern is erected on a square tower attached to the main building. A white fixed light, 75 ft. above high water level, and visible from all points of approach.

Gannet Rock Light—The Gannet Rock is 66 ft. above high water, and has a light-house upon it, painted black and white, in vertical stripes A fixed white light (visible 12 miles) lies S. W. by S., distant 3½ miles from the southern point of Three Islands, and S. S. E. ½ E., 7 miles from the S. W. head of the Grand Manan. A gun is fired to answer signals during a fog. There are a number of small ledges and sunken rocks about it, which are always breaking. The light stands conspicuously in the immediate vicinity of all the sunken rocks and dangers, extending from the old Proprietor to the Seal Islands off Machias, a distance of about 20 miles. Between the northernmost and southernmost of the Murr Ledges there is a range of dangerous rocks and shoals, many of them above water, and which extend westward from the lighthouse about 4 miles. From this range, farther westerly, about 6 miles, lies a dangerous breaker, called the Bull. This may be avoided by keeping three remarkable headlands, near the S. W. end of Grand Manan, open.

BROWN, BROTHERS & CO., Druggists, Ordnance Square, Halifax.

MACHIAS SEAL ISLAND LIGHTS—S. W. by W. 3 W. from Grand Manan, lie the Machias Islands. On the eastern island two lighthouses are erected, showing fixed lights, distant from each other about 200 feet in the direction of E. S. E. and W. N. W., by which they are easily distinguished from all other lights on the coast. Elevated about 54 and 58 ft. above high water, visible 15 miles. A gun is fired every 4 hours during a fog. Both buildings white.

Grand Manan Island Light—On Swallow Tail Point, N. E. side of the island. A white fixed light, 148 ft. above high water, visible 17 miles. Building white, Lat. 44° 45′ 22″ N. Long. 66° 44′ 4″ W. This is a conspicuous mark in the S. Channel between Brier Island and Grand

Manan.

LITTLE LIVER LIGHT—On an island at the entrance to the River. A white fixed light, varied by flashes every 90 seconds, 40 feet above high

water, visible 11 miles.

QUODDY HEAD LIGHT—On the S. E. side of Quoddy Head. A fixed white light, 138 ft. above sea level, visible in clear weather 17 miles. It bears from the Southern point of Grand Manan N. 4 E., 13 miles, and from the Northern point of said island W. N. W. 74 miles. Has a fog trumpet.

CAMPO BELLO LIGHT—On the N. E. extremity of the island. A white fixed light, 64 ft. above the sea. Visible 15 miles. Building white with a red cross. This light enables vessels to enter Head Harbor at all times. It is also a guide to vessels entering the main channel, to West Isles,

Moose Island, and the inner Bay to Passamaquoddy.

POINT LE PREAUX LIGHT—Upon this projecting headland, two fixed white lights, one above the other, distant 28 feet. The lower lantern is fixed to the outside of the building, and throws its light quite inshore, both to the eastward and westward into Mace's Bay. The highest light is 81 feet, visible 15 miles. Building red and white in horizontal stripes, 5 feet broad, and bears from the easternmost Wolves E. by N., 11 miles.

St. John, N. B., Harbour Light—On Partridge Island, at the entrance of the River and Harbour. A white fixed light, 120 ft. above high water, and visible 20 miles. Building red and white in vertical stripes. A Steam Whistle is sounded 10 seconds in every minute during fog and snow storms, audible 4 to 6 miles. There is also a Bell Buoy at the extremity of the ledge at the eastern end of the island, which is very useful to vessels in thick or rough weather. The bell can be heard 3 miles.

QUACO HEAD LIGHT—On a small rock lying off Quaco Head. A revo'ving white light, 58 feet above high water, showing twice full and twice dark in a minute, visible 15 miles. Building red and white in horizontal stripes.

CAPE ENRAGE LIGHT—On the point of that name in Westmorland, nearly opposite Apple River light in Cumberland. A plain white light, 151 ft. above the sea, visible 15 miles. Square white building.

GRINDSTONE ISLAND LIGHT—On Grindstone Island, Chignecto Bay. Lat. 45° 43′ 13″ N. Long. 64° 37′ 25″ W., 60 ft. above high water. Octagonal white tower.

APPLE RIVER LIGHT—On Hetty Point, N. side of the entrance to the River, and three leagues to the eastward of Cape Chignecto. Two fixed horizontal lights, 40 feet above high water, visible 10 miles. Square white building.

ROBERT A. BREHM, Washing Soda Manufacturer, Cor. Bedford Row and Prince Street, and 4 Maitland Street.

East from Halifax.

EGG ISLAND LIGHT-Off Jeddore. A revolving light, 85 feet above high water, attaining its greatest brilliancy every minute, showing alternately red and white faces. Building octagonal, painted black and white in vertical stripes. Lat. 44° 39′ 51″ N. Long. 62° 51′ 32″ W.

OUTER BRAVER, OR WILLIAMS'S ISLAND LIGHT—A revolving white flash light, 70 feet above sea level, visible 12 miles. Square white building with two black balls on its seaward side. A reef extends eastward from Beaver Island some distance. Lat. 44° 49′ N. Long. 62° 21′ W. White Head Island Light—On the S. W. point of the Island. A

bright flash light of 10 seconds duration followed by eclipses of 10 seconds, displaying alternately 3 flashes and 3 eclipses in a minute. Square white tower, standing 75 fathems from the water's edge, with an octagonal iron lantern, 60 feet above the sea level.

CRANBERRY ISLAND LIGHT—(Cape Canso.) Two white fixed lights, placed vertically 12 yards apart: the upper 75 ft., the lower 45 ft., above high water, visible 15 and 9 miles respectively. Tower striped white and red horizontally. Lat. 45° 19' 49" N. Long. 60° 55' 29" W. A fog trumpet has been placed on Cranberry Island, in operation during thick or foggy weather. Each blast of five seconds duration, with intervals of 20 seconds, audible 6 to 10 miles.

GUYSBOROUGH HARBOUR LIGHT-On the W. side of the entrance to the harbour, head of Chebucto Bay. A fixed white light, 30 feet above high water, visible 8 miles. Lat. 45° 22′ 47″ N. Long. 61° 29′ 11″ W.

EDDY, OR SAND POINT LIGHT—(Gut of Canso.) On the W. side of the S. entrance to the Strait of Canso. Two horizontal fixed white lights, 24 ft. apart, elevated 25 ft. each, visible 8 miles. Square white building, with a black diamond on the seaward side.

WEST SIDE GUT OF CANSO, NORTHERN ENTRANCE-A white fixed light, 110 ft. above high water, visible 18 miles, or between Cape George and Port Hood. White tower standing 120 yards from the shore. Lat. 45° 41' 42" N.

POMKET ISLAND LIGHT-St. George's Bay, Antigonish Co. Standing on the N. side, 50 yards from the E. end of the island. A fixed red light. Square white building, 50 ft. above high water. Lat. 45° 38' N. Long. 61° 49′ W.

CAPE ST. GEORGE LIGHT-On the N. side of the cape. A revolving white light every half minute, visible 25 miles. 350 ft. above high water. Square white tower. Lat. 45° 52′ 35" N. Long. 61° 55′ W.

BIG CARIBOU ISLAND LIGHT—On the N. E. end of the island. A white revolving light, showing its greatest brilliancy every minute. Square white building, standing 130 ft. from the point, and about 35 ft. above high water. Lat. 45° 44′ N. Long. 62° 46′ W.

PICTOU ISLAND LIGHT—On the S. E. point of the Island. A white fixed light, 52 ft. above see level, visible 12 miles. Square white build-

AMET ISLAND LIGHT-Off Tatamagouche harbour. A fixed white light.

The lantern is placed on the top of the keeper's dwelling, which is painted white. Lat. 45° 49° 39" N. Long. 68° 9° W.

Pictou Harbour Light—On the S. point of the entrance to the harbour. A white fixed light, 65 feet above sea level, visible 12 miles. A small red light is shown below the lantern. Building octagonal, in red and white vertical stripes.

Province -Barrington Street,

Ī

Sutcliffe's COFFEE

ARICHAT LIGHT - On Marache Point, S. side of the entrance to the harbour. A white fixed light, 34 feet above high water, visible 8 miles. Square white building.

GREEN ISLAND LIGHT-Near the S. E. end of Madame Island, off the town of Arichat. A fixed red light, elevated 70 feet above high water. Lat. 45° 28° 51" N. Long. 60° 53° 40" W. The lantern is placed on the top of the keeper's dwelling, which is painted white.

LOUISBURGH LIGHT-On Lighthouse Point, N. side of the entrance to the harbour. A white fixed light, 85 ft. above high water, visible 16

miles. Square white building, with vertical black stripes.

SCATTARI ISLAND LIGHT-On the N. E. point of the island. A revolving light, visible 60 seconds and invisible 30 seconds, elevated 99 feet, visible 15 miles. Building white, Lat. 40° 2' 13" N. Long. 59° 40' 18' W. The light should never be brought to bear to the eastward of N. N. E. or to the southward of S. S. W., nor approached nearer than 14 miles. Gun fired as signal, and a boat for assistance.

FLINT ISLAND LIGHT-On Fliat Island, E. coast of Cape Breton, between Cape Granby and Point Gage, entrance to Cow Bay. Lat. 46° 11' 5" N., Long. 59° 47' W. A revolving light, attaining its greatest brilliancy every 15 seconds, 65 feet above high water. Octagonal white building.

Low Point Light-On the eastern side of the entrance to Sydney, C. B. harbour. A white fixed light, elevated 70 feet, visible 14 miles.

Building red and white vertically.

OUTER BIRD ISLAND LIGHT-Between the entrance of the Great Bras d'Or, and St. Ann's (E. coast of Cape Breton). Alternate flashes of red and white at intervals of 60 seconds, elevated 77 ft., visible 14 miles. Octagonal white building. Lat. 46° 25' N., Long. 60° 25' 80" W.

BLACK ROCK POINT LIGHT-S. side of entrance to Big Bras d'Or, C. B. A fixed white light. Square white building, about 45 feet above high water, standing 100 feet from the point. Lat. 46° 19' N., Long.

60° 24′ W.

St. Paul's Island Lights-On the S. point of the island, Lat. 47° 11' 20", Long. 60° 9' 36", is an octagonal lighthouse, exhibiting a revolving white light every minute, elevated 140 ft., visible 20 miles on all bearings, except between S.S. E. southward to W. On a rock, 26 feet from the end of the island, in Lat. 47° 13′ 50″, Long. 60° 8′ 20″, is another similar building of the same height, showing a white fixed light, visible 20 miles, between N. by E. & E. northward to E.N.E. A bell is sounded during a fog, and a gun fired every & hours.

MARGARIE, OR SEA WOLF ISLAND LIGHT-On the N. W. side of Cape Breton, nearly midway between Mabou and Cheticamp harbours, and distant 24 miles from the main land. A white fixed light, near the centre and summit of the island, elevated 298 feet, visible 21 miles from all

points of approach. Square white building.

PORT HOOD LIGHT-A fixed light, shows red on the N. side, and white to the southward, elevated 54 feet, and visible 10 miles. Square white tower. Lat. 46° N., Long. 61° 81′ 40″ W.

CAPE RACE LIGHT .- (S. E. Point of Newfoundland.) -A revolving white light, attaining its greatest brilliancy every half minute, elevated 189 feet, visible I7 miles. The S. E. face of the building is striped red and white vertically. Lat. 46° 81′ 44" N., Long. 58° 7' 00" W.

The year 5630 of the Jewish Era commences September 6, 1869. The year 1286 of the Mahommedan Era commences April 13, 1869.

The Seasons.—The annual revolution of the earth is accomplished in 865 days, 5 hours, 48 minutes, and 51 seconds. This is the proper or natural year, because it always keeps the same seasons to the same months. The sideral year is the space of time the sun takes in passing from any fixed star, till it returns to the same star again; it consists of 365 days, 6 hours, 9 minutes, and 11½ seconds, being 20 minutes and 20½ seconds longer than the true or tropical year. The earth moves in an elliptical orbit, whose eccentricity or distance of its foci from the centre is 1,618,000 miles; that is the ellipse or oval in which it moves, is double the eccentricity, or 3,236,000 miles longer in one direction than it is in another. In January the sun moves at the rate of 69,600 miles an hour, but in July its rate of motion every hour is only about 66,400 miles. In the course of the earth's revolution, the inhabitants of every clime experience, though at different times, a variety of seasons. Spring, summer, autumn, winter, follow each other in constant succession.

Explanation of the Calendar Pages.

Column.

LEFT HAND PAGE.

1 and 2-Days of the Month and of the Week.

8 "4—The rising and setting in mean time of the highest point, or upper limb of the Sun, corrected for parallax and a more correct constant of refraction.

5—The Sun's declination adapted to apparent noon, or the instant when the Sun's centre is on the meridian of Greenwich.

6-Equation of time, or quantity by which the Sun is slow or fast of the clock at noon, apparent (not mean) time at Greenwich, or a quarter before 8 o'clock in the morning at Halifax.

7-Length of days in hours and minutes.

8-The rising of the Moon.

9-The setting of the Moon.

10—The time of the Moen's southing, or meridian passage. This column contains the Greenwich mean astronomical time at which the Moon's centre is on the upper meridian of Greenwich. This column also gives the time of high water at Parrsboro', Horton, Cornwallis, Hantsport, Windsor, Newport, Truro, &c.

11—The Moon's place in the Signs or Constellations of the Zodiac.

The Phases of the Moon are given at the top of the columns of each

month.

The FARMER'S CALENDAR is placed at the foot of the right hand columns of each month.

RIGHT HAND PAGE.

1-The days of the Month.

2-Sundays, Weather, Phenomena, Anniversaries, &c.

3-The time of High Water at Halifax, N. S.

Picteu, N. S., & C. Tormentine, N. B.
Annapolis, N. S., St. John, N. B., &

Portland, Maine. St. Johns, Newfoundland—of that tide

which immediately precedes the meridian passage of the Moon. These four columns are computed on the supposition that the time of High Water on the days of the New and Full Moon (L'establissment du port) is, at Halifax, 7h. 30m.; at Annapolis, St. John, N. B., and Portland, 1lh. 14m.; at Pictou and Cape Tormentine, 10h.; and at St. Johns, Newfoundland, 6h. 30m.

This mark $\not\leftarrow$ opposite every alternate Friday, commencing January 8, denotes the days on which the mail is closed at Halifax for Great Britain by steamer for Queenstown and Liverpool.

The top of the left-hand column of each month contain a brief notice of Meteors or shooting stars.

. All the calculations are made to mean solar time, which has superceded the old mode of reckoning by apparent time.

THE LAST DAY.—Captain W. A. Baker, of the Royal Bombay Engineers, has, after several years' study of prophecy, fixed the period of the last day at 3h. 40m., P.M., September 20, 1878—Greenwich time!

Sponges, Brushes, Combs and Perfumery at BROWN BROTHES & Co.

ROBERT A. BREHM, Soap and Candle Manufacturer, Cor. Bedford Row and Prince Street, and 4 Mailiand Street.

- Last Quarter, 5th d. 2h. 9m. morning, bearing East toward N. New Moon, 12th d. 2h. 89m. afternoon, bearing South-west.
- D First Quarter, 20th d. 8h. 18m. afternoon, bearing West toward N. O Full Moon, 27th d. 9h. 16m. afternoon, bearing Northwest.

The column of the moon's southing gives the time of high water at Parrsboro,' Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

There is farm-work for winter as well as summer. Labour if then accomplished lesives greater time and room for the necessary operations of seed-time and harvest. Many farmers fall to find this work—fall, perhaps, because they look in the wrong place for it, or have very little mind to engage in anything beyond the necessary chores of foddering and fireword—giving these no very systematic or economical attention. The thorough systematic farmer thinks no duty or chore beneath his attention. He finds no lack of employment for every day in winter. Attention to the comfort and regular feeding of his cattle is repaid by their thrift and growth; the dairy does not cease to be productive; the young stock increase in weight and size; his sheep are gaining in fiesh and wool, and promise a healthy increase the coming season.

METEORS, OR SHOOTING STARS.—No account of the solar system can well be considered complete without some mention of a class of bodies that have for years past arrested the attention of the multitude as well as of astronomers—meteors, or shooting stars—of which, dense showers have been annually noticed about the 13th of November. The observed parallax of several shooting stars proves them to exist at a height far exceeding that of the sensible limits of our atmosphere, thus destroying the theory that has hitherto regarded them as produced by the incandescence of gases in the air. Comparative observations made in 1823 at Breslau, Dresden, Leyden, Brieg, &c., assigned to certain of these so-called meteors, an elevation of no less than 500 English miles. The apparent velocity of some has amounted to 36 miles per second, almost

The column of the moon's southing gives the time of high water at Parraboro Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

Every good farmer keeps his tools housed, but many during the busy period of summer, have left out some that should have been sheltered. The horse-rake has perhaps been placed on the fence in the corner of the field; the plough still lies at the side of the wheatfield, where it was left when the harrow was brought in; the ox cart stands behind the barn, exposed to all weather; the roller has not seen shelter since last spring; two hoes and a spade lean against the side of the waggon house, and other implements lay about in various directions. The aggregate value of all may be \$100; five years' exposure would totally ruin them for any value, and if so, then they are losing a fifth this year, or \$60. Yet 50 cents worth of labour would place every one in good shelter. So much for the want of a little thinking; and doubtless not a few who are thus wasting so rapidly their property, would spend half a day in making a sharp bargain, in order to get an additional dollar from a neighbour—saving at the tap and wasting at the bunghole! A coat of paint applied to tools just after the summer seasoning, will ponetrate the cracks and be of great service in keeping out water.

double that of the earth's motion in the ecliptic. Now, should half this be supposed an illusion, arising from the opposite motion of the earth, there would still remain a velocity of 18 miles per second, which exceeds that of all the superior planets, except the earth. The usual direction of these stars makes it manifest, independently of other proof, that though they may pass into our atmosphere and take fire there, at least they have not their origin in it. The more usual course of shooting stars appears diametrically opposed to the earth's motion in her orbit. Arago thinks that every thing tends to confirm the existence of a zone consisting of millions of small bodies, whose orbits meet the plane of the ecliptic near the point occupied by the earth in November—a new planetary world, in fact, which has just begun to be revealed to us. It appears highly probable that these "November meteors" derive their origin from a nebulous body which revolves round the sun, and which, in certain parts of its course, comes very near the orbit of the earth, so as to be

7 The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor Newport, Truro, &c.

Many farmers suffer a great deal of anxiety; some of them pass sleepless nights in thinking how they shall obtain the highest market price for their products. Should they happen to sell before the highest figure is reached, or delay selling till prices have gone down again, disappointment and chagrin prove a lasting source of discomfort to them. Between the anxiety beforehand and the fretting afterwards, they are in a great measure unfitted for a close attention to their business, and it may be questioned whether they do not lose ten times as much in other ways than in failing to hit the market exactly. The best rule is when prices are low, not to spend one's whole time in endeavouring to get a lttle more, but to raise better crops, and make larger profits on home management. Every man who gives diligent attention to his business, should be allowed to make fair profits. The produce dealer must be one of these, or his business would cease; and he must, sometimes, obtain heavy gains to compensate for his frequent losses. Farmers should bear this in mind, and not be too eager to obtain the last cent.

within its attractive power; and if such a body be the source whence these meteors proceed, it may also account for the phenomenon of the zondicel light.

There were unusual displays of meteors about November 13, in the years 1792, 1822, 1821, 1832, 1833, 1834, 1837, and 1838—the number seen in some of these years being very great; in others less. Professor Newton, of the United States, who has investigated the phonena of the "November 1 states," found, by comparing together 13 storic star showers, occurring between the years 902 and 1833, that a con mon shower existed on November 13, which returned with especial feeling about every 33 years. In 1825 the stars were so numerous, and approved in so many parts of the heavens at once, that their num-

The column of the moon's southing gives the time of high water at Parrsboro's Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

The importance of good fences is well understood by those who have observed the difference between crops safe from all intruders, and those occasionally trodden down and ruined; between moving on with the work without interruption, and the frequent annoyance of stopping important operations, to run after intruding cattle, colts and pigs. Repairing fences in spring is one of the earliest tasks that claim the farmers' attention. Board fences should be annually examined throughout their whole length, and loose boards nailed tight. New board fences should never be battened on the face or joints over the posts, as the practice tends to cause decay; but when the ends begin to rot and become loosened, battens will secure and make them strong for several years longer. Many old farms are irregularly fenced; but whether old or new, they should as soon as practicable be regularly divided in the best manner. The old fences should be removed when necessary, and new ones erected in the right place.

BROWN BROTHERS & CO., Druggists, Ordnance Square, Halifax.

W. SUTCLIFFE, General Grocer, 133 Barrington Street, opposite the Parade,

mi

bers could only be roughly approximated to. They were compared to half the number of flakes of snow seen in the air during a common fall of snow. When their number was greatly diminished, 650 were counted in 15 minutes in a zone less than the tenth of the visible horizon. This number was but two-thirds of the real amount, which would thus be 975, and for the whole visible horizon 9,750. This would give 39,000 stars per hour. The phenomenon lasted more than seven hours, therefore the number of stars passing in sight was more than 273,000; for it must be recollected, that this calculation is founded on observations which were not made till the phenomenon was considerably on the decline. It is worthy of remark that, with few exceptions, these showers all appeared to proceed from a common centre, the position of which has been uniformly in nearly the same point of the heavens, viz., in some part of the constellation Leo. The principal exhibition has at all times,

The column of the moon's southing gives the time of high water at Parrsboro's Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

As soon as the meadows are dry enough to bear feet without injury to the turf, they should be carefully picked of all loose and projecting stones, which might injure a mowing machine, and then well rolled so as to make the surface as smooth and perfect as possible. Stumps should be dug or pulled out, brush and other rubbish removed, and small hillocks levelied down Meadows which were top dressed with coarse manure in autumn or winter, which was more or less spread in lumps, should be harrowed as early as possible, so as to break those lumps and spread the whole uniformly. Cattle droppings, on meadows or pastures, should be finely beaten to pieces and well scattered over the surface, as soon as the frost will admit, and before the frost has all disappeared from the soil. It is perhaps scarcely necessary to mention that no good farmer ever allows either his meadows or pastures to be touched by a hoof early in spring while the ground is soft. Much is lost by thin and uneven seeding of meadows.

81 Casi Spong and in all places, occurred between midnight and sunrise, and reached its maximum between 8 and 4 o'clock. Professor Newton's prediction having aroused the attention of astronomers, great preparations were made for observing those predicted for November 13, 1866. The display was perhaps not quite so fine as expected, but still sufficiently so to any one who saw such a sight for the first time. About 9 in the evening, a few solitary meteors began to be observed; between 11 and 12 they became more numerous, appearing in the east, and passing off by the north and south as expected, the radient region (in the constellation Leo) being as yet searcely above the horizon. The absence of the Moon allowed the display to be seen in all its magnificence; and as the constellation Leo ascended above the horizon, it became evident that the radient

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

June, with farmers, is a very important month. The operations of the farm are now moving forward with great rapidity. The great wheel of Nature is revolving with unabated rapidity, and has brought us to the long days of June, laden with rich beauty, with pleasure, happiness, end with cheering promises for the future. Every thing now needs the personal attention of the farmer. The seasons never tarry for those who are tardy. If we neglect to sow and plough in time, or to cultivate or prune at the season of the year which has been appropriated as the most proper time for certain operations, we must sustain the loss. During the greater portion of the present mouth, the plough, the cultivator and the hoe will be the chief implements in use on the farm. One horse and a good cultivator will accomplish more in a potatoe or cornfield than a score of hands with hoes, provided a skilful workman holds the cultivator or horse-hoe. The grand secret of success in growing good crops, and of keeping a farm good, and restoring an impoverished call to its original fertility, lies in keeping improved breeds of all kinds of stock, and in making a good supply of barn-yard manure, and applying it to the call.

JUNE 30 Days.

region of the November shower was still the same (near to the star Gamma Leonis). The meteors continued to come between midnight and 2 A.M. thicker and faster, and could be counted by hundreds. Many were seen at the same time. First, one would start towards Ursa Major, followed instantly by another emulous of the first; then one would rush off southwards across Orion; then one would sail majestically over the Zenith; others would ascend vertically from Leo for a short distance, others would shout directly downwards. The trains left by some were beautiful to behold—some green, some yellow, some red, but more of a bluish cast. In some cases the trains were visible for several minutes. Great numbers near Leo were short, probably from foreshortening of their real path. Nothing like explosions were heard; indeed the stillness accompanying the activity overhead forced itself on one's notice

The column of the moon's southing gives the time of high water at Parraboro', Cornwallis, Hoston, Hantsport, Newport, Windsor, Truro, &c.

Timothy and clover are in a large degree our cultivated grasses, though an attention is given to June or blue grass, red-top, fowl-meadow, orehard mass, &c.; yet most farmers sow only the two first. The most successful well be found with barley, using about double the usual quantity of timothy usual clover. Sow before the last light harrowing, or afterward following with the roller; which in most cases covers the seed sufficiently and leaves the soil in a good state for the growth of the grass crop. The product of land a seeded is usually large—the clover giving considerable fall feed, and a good crop of hay the next year, and if desired, a fair product of clover seed. To timothy does not appear largely until the second year, and in case the cover suffers from the winter, takes its place—by the third year the crop will as mostly timothy, and if it is desired to remain in grass for some time, should receive a top-dressing. Summer seeding is but little practiced—the object of summer seeding is to get a grass crop as soon as possible; but, maless the summer is cool and moist, disappointment results.

ALVERSED SET SESTING

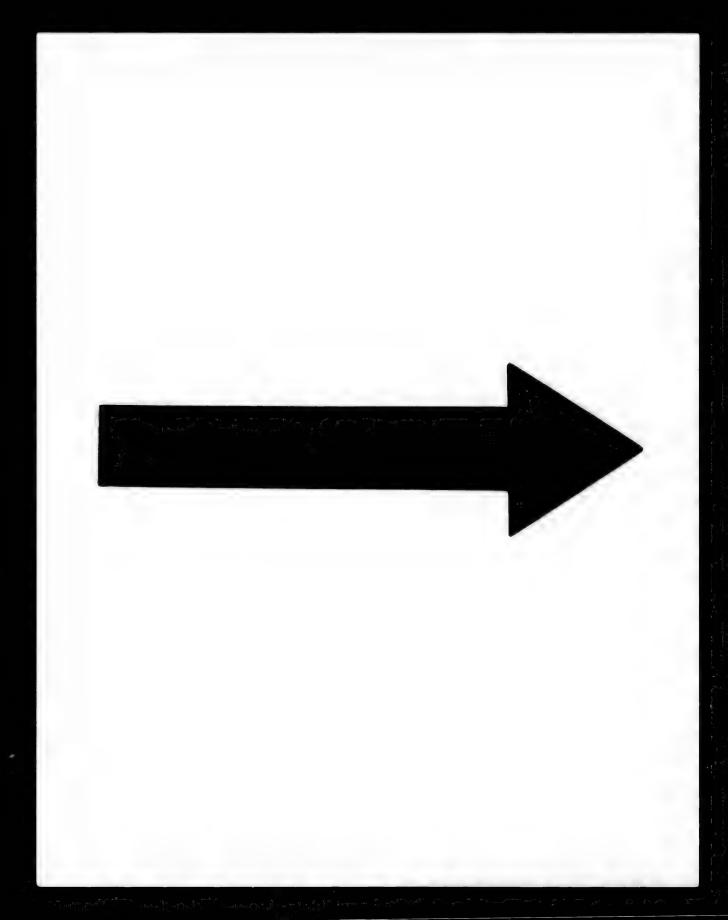

Photo

After 2 A. M. the number rapidly declined, though they continued to be seen throughout the night. Above eight thousand are said to have been counted at the observatory, Greenwich, far exceeding any previous record at that place, and approaching, though by no means equalling, the American display of 1833.

That such evanescent and apparently erratic bodies as meteors should yield to any investigation, seems surprising. But persevering study of their complex appearances, a true spirit of induction applied to collect facts, has done the work, and now order is seen to reign in that which was comparative disorder; shewing that Nature every where works on one uniform plan. The subject is worthy of particular attention, and

ROBERT A. BREHM, Washing Soda Manufacturer, Cor. Bedford Row and Prince Street, and 4 Maitland Street

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

THE birds are labourers. How much travel, what a circuit of country, has to be gone over; what a sharp look out for the little sticks and a hair to carry at one time for the nests! And so we might speak in detail of the skill, in-dustry and labour necessary to make into a nest this great amount of building dustry and labour necessary to make into a nest this great amount of building material. It is the declaration of God that birds are not to sow, or to reap, or to gather into barns; where then is the provision made for feeding this army of little labourers? Where? Why in the worm that is gnawing at the root of vegetation; in the grub that is making naught the labour of the planter; in the millions of insects that are destroying, in the bud and the flower, the promise of the fruit tree; in the larvæ or egg deposited in the bark of the tree. Now, see you not that he who destroys the birds of the air; that he who breaks in upon and breaks up their industrial or domestic arrangements, does what he can to prevent the husbandman from receiving the reward of his labour, lessens the product of the crop he plants, of the field he mows or harvests, and of the fruit tree he rears. mows or harvests, and of the fruit tree he rears.

future observations may not only throw light on this particular phenomenon, but open to our view a species of celestial bodies with which we were formerly unacquainted. The recurrence of this singular phenomenon on the morning of Nov. 13, 1836, and very nearly at the same hour, the radiation of the meteors from the same point of the heavens, differing only half a degree (as did those of 1834), namely, 145° right ascension in the face of Leo, and all the attending phenomena being the same, though upon a scale less magnificent—settle the question as to its being a regular and annual phenomenon. It is a circumstance worthy of particular notice, that these meteoric showers take place chiefly on the 12th and 13th of November, and hence they are now distinguished by the name of the November meteors. The facts which have already

347 The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

SLUGGISH farmers will not do their work well unless compelled to do so. If weeds never grew, they would be tempted to leave their fields untouched. Now in fighting weeds they give an impetus to the crop. Good farmers do not wait to be driven; they do not allow necessity to drive them; on the contrary, they themselves manufacture necessity. A great deficiency on many of our farms, is a want of smoothness; stones and brush need removal; we spots, or the whole surface, need underdraining, that the soil may become uniformly mellow. Good farmers will not wait to be compelled; but the rest will discover in time that modern farm machinery will drive them into smooth fields. Mowers and reapers will benefit largely by the reformation, for they will soon discover that it is much cheaper to remove by five minutes' labour, a projecting stone or other obstruction, than to lose half a day in haying time, with half a dozen hands, besides a charge of five dollars for repairing the machine. Drill sowing and drill culture, which are beginning to effect an immense saving of labour, cannot be performed well among stones and stone heaps, briers and elder bushes, nor among clods of earth!

been observed afford a sensible proof of the attractive power of the earth over bodies at a distance in the heavens; and it is to be hoped that the future observations and investigations of scientific men, in relation to such phenomena, will throw some further light on the nature and properties of bodies which have hitherto been involved in darkness and mystery. What the destination of such bodies may be, or the ends they serve in the economy of nature, we are as yet entirely ignorant of. It appears evident that they are bodies of no great density, otherwise their effect on the earth might have been more terrific and disastrous. Had their quantity of matter been considerable, when accompanied with so prodigious a velocity as they evidently had, their momentum would have been such as to have dashed them with violence upon the earth, where the most appalling effects might have been produced, in the de-

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

By soiling is meant the practice of keeping cattle in the barn yard or stable during the summer months, and feeding them on green crops. By this system more cattle can be kept on a given quantity of land, and a large quantity of excellent manure is produced. It is claimed, too, that cattle will fat more rapidly, or give more milk, than when allowed to roam the field in search of food. Indian Corn is probably, all things considered, the best green crop to raise for milch cows and working cattle. By sowing it thick, in rows, and manuring it highly. A heavy crop of succulent stalks may be obtained, containing more nutritive matter probably, than can be raised on an acre in any other way, except by irrigating grass land. One of the great advantages of soiling, or in growing any food for stock, is the means it affords of providing manure for the high-priced grain crops. It is, therefore, very important that a crop grown as food for stock, should be as slightly exhausting to the soil as possible. Red Clover is extensively used in England for soiling horses.

molition of human habitations, and the destruction of thousands of their inhabitants. But it does not appear that any of them made their way through the atmosphere to the surface of the earth, which was doubtless owing to the comparatively light materials of which they were composed. Meteoric phenomena, nearly resembling what has now been described, have occurred at seven il former periods. One remarkable instance of what was called "showers of fire" occurred above 80 years ago at Quito in South America. A more extensive and remarkable phenomenon of this kind occurred on the 12th November, 1779, at Cumana. It occurred towards the morning, when thousands of meteors, colides, fire-balls, or falling stars, as they were variously denominated, succeeded each other during four hours. Their direction was from North to South. They

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

To carry sheep well through the winter, they should come to their food at a regular set time every day, unless the weather be very cold; then they may repose a little longer in the morning. With two feeds a day, between 8 and 9 A. M., and before 3 P. M., sheep will require one-fourth less fodder than if fed three or four times a day. In no case put off feeding until sun-down, The more exercise sheep have the more they will consume, but they rarely eat any at twilight. Healthy sheep will winter well on one bountful feed per day given about 11 A. M. The best time to feed grain is immediately after they consume their hay, and before they lie down to ruminate and digest their food. Let the grain or potatoes be placed in their feeding troughs before the sheep have access to them. Hay should always be fed in racks or boxes. Feeb'e sheep should be fed no more frequently than strong ones, but with better food. A large share of the profits of Sheep husbandry arises from the increase in lambs. Sheep in good condition produce better lambs and take better care of them. and take better care of them.

E. W. SUTCLIFFE'S CELEBRATED COFFEES, 133 Barrington and 25 Brunswick Streets

rose in the horizon at E.N.E, followed the direction of the meridian, and fell towards the South. There was little wind and this from the east. No trace of clouds was seen. There was not a space in the firmament equal in extent to three diameters of the moon, which was not filled with burning stars. They were of different sizes: they left luminous traces of from 5 to 10 degrees in length. The appearance of these traces continued 7 or 8 seconds. Many of the stars had a distinct nucleus as large as the apparent disk of Jupiter. The largest were from 1° to 1° 13' in diameter. Their light was white, and they seemed to burst as by explosion. They were seen by all the inhabitants of Cumana, the oldest of whom asserted that the great earthquake of 1766 was preceded by similar phenomena. The conclusion arrived at by Professor Olmsted

The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Trure, &c

THERE is no great amount of labour to be done out of doors during this month. The most important work of the farmer now is the care of his domestic animals, to see they are well sheltered from cold and wet, and properly fed and watered. The year's profit or loss depends greatly on the manner in which they are wintered. Animals entering the winter months in high condition, are already half wintered. A fat strong animal will be warm and comfortable where a poor weak one can hardly live, and the hearty, vigorous one will digest and assimilate food which the weak one would scarcely taste. Regular hours for attending to all matters, is important, particularly in milking cows, foddering, feeding, and watering. Cattle should be fed often, and but little at a time: they thrive better when their dormitories are kept clean, and freely littered with straw or dry leaves. Cattle, horses and sheep should have salt where they can have access to it whenever they desire it. Sprinkling hay too freely with salt is injurious, as over salting diminishes the nutriment and weakens the animals.

after a due consideration of these phenomena was that the meteors of November 13 consisted of portions of the extreme parts of a nebulous body, which revolves around the sun in an orbit interior to that of the earth, but little inclined to the plane of the ecliptic, having its aphelion near to the earth's path. Arrago appears to entertain an opinion on this subject not very different from that of Professor Olmsted. He supposes that there may be myriads of bodies, composed probably of nebulous matter similar to the tails of comets, circulating round the sun in a zone or ring that crosses the earth's orbit at that part where it is about the 12th November, and that some of them, drawn from their course by the earth's attraction, fall towards it, and taking fire when they enter the atmosphere, present the luminous phenomena of falling stars.

Letters for New Zealand and Australian Colonies, 28 cents; newspapers 5 cents. Letters for British Columbia and Vancouver's Island, 10 cents; newspapers 2 cents. Letters for Red River 6 cents: newspapers 2 cents.

ters for Red River 6 cents; newspapers 2 cents.

Mails for Bermuda, St. Thomas, and the British and Foreign West
India Islands, are made up every alternate Thursday at 9.30 P M., commencing January 7, 1869. Letters 124 cents; newspapers 2 cents.

Mails for Newfoundland are made up every alternate Thursday at 9.30 P.M., commencing January 7, 1869. Letters 124 cents; newspa-

pers and books same as between places in the Dominion.

LAND MAILS between places in the Dominion and Prince Edward Island (see table closing and arrival of mails at Halifax, p. 88). Letters 3 cents; if unpaid, 5 cents. Local or drop letters 1 cent. Newspapers (Dominion) sent to subscribers, once a week, 5 cents; twice, 10 cents; thrice, 15 cents; daily 30 cents,—per quarter. Transient newspapers 2 cents each. Books, pamphlets, prices current, patterns and samples of merchandize and photographs, 1 cent per oz. Printed circulars, when sent singly, 1 cent each; Periodicals 1 cent per 4 ozs.

Semi-daily mail to and from Dartmouth. Letters 8 cents; if unpaid,

cents.

PARCEL POST.—Under 4 lb. 124 cents; between 4 lb. and 1 lb 25 cents; between 1 and 14 lbs 374 cents; between 14 and 2 lbs 50 cents; between 2 and 24 lbs 624 cents; between 24 and 3 lbs. 75 cents, between 3 and 34 lbs. 875 cents; between 8 and 4 lbs. \$1.00. Registration fee 5 cents. Parcels to places in the Dominion may contain books, daguerreotypes, photographs, printers' proof and copy, military returns, states and rolls containing written figures and signatures, returns, deeds, legal papers, and all of a like character, not being strictly letters. Photographs in cases, within the Dominion, are liable to parcel post rates. Samples of seeds, including cuttings, bulbs, roots, &c., pass at 1 cent per oz. within the Dominion.

Mails for St. Pierre and Miquelon are forwarded in summer by land route to Sydney, C. B., where they are received by the French mail steamer—and during the winter months direct from Halifax. Letters 8

cents: newspapers 2 cents.

REGISTRATION is applicable to all mailable matter beside letters. Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a registered letter can be traced when one unregistered cannot, and the posting and delivery or non-delivery can be proven. Registration fee on letters: to any place in the Dominion, Newfoundland, or Prince Edward Island, 2 cents; to the United States, 5 cents; to the United Kingdom, 8 cents; to France, 17 cents per 4 oz.

Letters containing money or valuable enclosures should always be registered. No letter, parcel, or packet, of any description whatever, can be received for registration unless both postage and registration fee

are fully prepaid.

DEAD LETTERS opened and returned to the writer on payment of postage due thereon, together with 5 cents additional on each letter, and if registered, a further sum of 2 cents.

Mails are made up for an	d received from places ma	rked * by St. John, N. B.	steamer, via Windsor.

BROWN BROTHERS & Co.-Gold Leaf, Dry Paints and Varnishes.

ROBERT A. BREHM, Soap and Candle Manufacturer, Cor. Bedford Row and Prince Street, and 4 Maitland Street

Mails for all places named in the foregoing table are made up at 8 P.M., except the second semi-daily mails for Windsor, Truro and Pictou, which are made up at 2 P.M. Mails from all those places are due at Halifax by the railway trains from Truro, Pictou and Windsor. The mails from Lunenburgh, Liverpool, Sheet Harbor, &c., by mail coach, are due at 7 P.M.

Ship letters.—Letters, by private ship, from the United Kingdom, in ship letter mail, 2 cents, if addressed to the port of arrival, and to other places in the Dominion, 5 cents. Loose ship letters from the United Kingdom, British Colonies, and Foreign countries, 4 cents. From places in the Dominion, if addressed to the port of arrival, 4 cents; and to other places within the Dominion, 7 cents. The Postmaster General may make such reasonable compensation, as he may see fit, to masters of vessels, not being Post Office Packets, for each letter conveyed by such vessels between places beyond the sea and the Dominion, and may direct that at any port such vessels shall not be permitted by the officers of Customs to enter or break bulk until all letters have been delivered at the Post Office, nor until the master has made a declaration that he has delivered all.

All letters are charged by weight, irrespective of distance, and a uniform rate of 3 cents per 1 oz. prevails throughout the Dominion. The rates of postage herein mentioned, all refer to a single letter of half an ounce. If it exceeds the \(\frac{1}{2} \) oz., but less than 1 oz., it is charged double, and so on according to weight. All letters, newspapers, and other mailable matter by mail, must be prepaid by having stamps of the value

The stamps are to be affixed to letters, pamphlets, &c., on the upper right hand corner. Postmasters to stamp the name of the office and date distinctly on every letter.

The Postmaster General has the exclusive privilege of transmitting letters within the Dominion; and (except in the cases hereinafter mentioned) any person collecting, sending, or delivering letters, incurs a penalty, not exceeding \$20, for each and every letter so conveyed or found in his possession. Such penalty not to apply to, 1. Letters sent by a private friend, provided such letters be delivered by such friend to the party addressed; 2. Letters sent by a messenger on purpose, concerning the private affairs of the sender or receiver; 3. Commissions or returns thereof, issuing out of a court of justice; 4. Letters addressed to a place out of the Dominion, sent by sea and by a private vessel; 5. Letters lawfully brought into the Dominion, and immediately posted at the nearest Post Office; 6. Letters of merchants, owners of vessels, or of the cargo or loading therein, sent by such vessel, or by any person employed by such owners for the carriage of such letters according to their respective addresses, and delivered to the persons to whom addressed, without pay or reward for so doing; 7. Letters concerning goods or merchandize, sent by common known carriers to be delivered with the goods, without pay or reward; 8. Nothing herein contained to authorize any person to collect any such excepted letters for the purpose of sending or conveying them. No person obliged to send any newspaper, pamphlet, or printed book by post.

Places of deposit for the reception of prepaid letters and newspapers

in the city of Halifax, have been established:-

This Bank is kept in the Province Building. Hours of attendance daily, from 10 to 8 o'clock, except on Saturdays. Cashier, Jno R Wallace. Clerk, Jno Goudge.

EXPLANATION OF SIGNALS.

Made on the Ship Staff at Citadel Hill, when vessels are seen from the Citadel or reported from an outpost.

For 1 square rigged vessel, 2 balls close up, one on the outer halliard and one on the inner halliard.

2 Do. 1 ball hoisted on the outer halliard, and 1 close up on the

inner halliard.

66

3 Do. 2 balls close up, one out and one in.

4 Do. 2 balls separated, and 1 close up on the inner halliard.

5 Do. a pendant of any colour on the outer halliard, and one ball close up inside.

" 6 Do. a pendant under a ball close up on the outer halliard, and a ball at the inner halliard close up.

7 Do. a pendant over a ball close up on the outer halliard, and a

ball close up on the inner halliard.

8 Do. a pendant under two balls close up on the outer halliard,

with a ball close up on the inner halliard.

Do. a pendant between two balls close up on the outer halliard, with a ball close up on the inner halliard.

" 10 Do. A flag of any colour close up on the outer halliard, with a ball close up on the inner halliard.

The above balls, &c., are hoisted on the east or west yard arm, according to the quarter the vessel first appears in.

When sailing vessels are reported from an outpost, the following signals are made on the lower yard, now used exclusively for sailing vessels, as repeats:—

For a square rigged vessel, two balls of a size, one at the outer, the other at the inner halliard, close up.

A Ship, a large ball at the end of the yard, with a small one at the inner halliard.

A Barque, a large do. at the end, with a small one dropped at the inner halliard.

A Brig, a small ball at the end of the yard, and a large one at the inner halliard.

ROBERT A. BREHM, Washing Soda Manufacturer, Cor. Belford Row and Prince Street, and 4 Mailland Street.

132

A Brigantine, a cross close up at the outer halliard. Two or more do., a cross half hoisted.

A Topsail Schooner, a cross close up at the inner halliard.

The upper yard of the Ship Staff is used solely to designate Steam Vessels, thus :-

Two large balls close up, one at the outer and the other at the inner

halliard, E. or W., a Steamer reported in that quarter.

A small ball at the outer, and a large one at the inner halliard, a second class Packet or Merchant Steamer.

A large ball at the outer, and a small one at the inner halliard, a Man-of-War Steamer, or Royal Mail Steamer, or large Merchant Steamer.

Two lanterns, one red and the other white, are hoisted at night to de-

note a Steamer reported.

The red lantern is always shown at the end of the yard arm, and the white one at the inner halliard, E. or W., according to the quarter the Steamer is reported in.

Numbers are indicated the same as on the lower yard.

When the description of vessel is ascertained, the following descriptive colours will be hoisted at the masthead :-

A Union Jack—a Flag Ship.

Man-of-War Screw Steamer, a white pendant with a blue ball in the centre, over the Union Jack.

Man-of-War Paddle Steamer, a white pendant with a blue bal! in the centre, under the Union Jack.

A red Flag pierced white, Royal Mail Packet from England.

A blue and red Flag crossed white, do. from Boston. A white and blue Pendant, do. from St. John's, Nfld.

A white and red Pendant, do. from Bermuda.

A blue Pendant-a Ship.

A blue and white Pendant-a Barque.

A red | endant-a Brig.

A red and white Pendant-a Brigantine. A white Pendant-a Sloop or Schooner.

A blue and white Flag horizontally divided—a Foreign or Neutral Fleet.

A white and blue Flag vertically divided—a Foreign or Neutral Man-of-War.

A blue Flag -a Foreign or Neutral Merchantman.

A red Flag-an Enemy's Merchantman.

A red, white and blue Flag, red next the mast-Enemy's Fleet.

A blue, red and white Flag, red next the mast, under Steamer's signal, a French Man-of-War.

American Flag (Stars and Stripes) under Steamer's signal, Amer-

ican Man-of-war.

When an English Packet arrives between evening and morning gun-fire, a red triangular flag will be kept flying at the mast head from seven till eight o'clock.

MERCHANTS' PRIVATE SIGNALS-PORT OF HALIFAX.

RED-Jas G. A. Creighton & Son, a red Flag, crossed white diagonally. Robert Noble & Sons. do. centre a white N.

.HALIFAX, N. S.

xecuted in the best style, iring printing of any kind REET

nance Square, Halifax.

1869.1 ALMANACK.

Has been used for nearly half a century with the most astonishing success in curing

Coughs, Colds, Hoarseness, Sore Throat, Influenza, Whooping Cough, Oroup, Bronchitis, Difficulty of Breathing, and every affection of the Throat, Lungs and Chest, including even CONSUMPTION.

There is scarcely an individual in the community who wholly escapes, during a season, from some one, however slightly developed, of the above symptoms—a neglect of which might lead to the last name l. a.d. most to be dreaded disease in the whole catalogue. The power of the "medicinal gum" of the Wild Cherry Tree over this class of complaints is well known; so great is the good it has performed, and so great the popularity it has acquired.

In this preparation, besides the virtues of the Cherry, there are commingled with it other ingredients of like value, thus increasing its value tenfold, and forming a remedy whose power to soothe, to heal, to relieve, and to cure discase, exists in no other medicine yet discovered.

The following Certificate from a respectable Lady of Halifax, exhibits the remarkable virtue of this renowned Lung Remedy:

HALIFAX, N. S., June 16th, 1860. Messrs. S. W. Fowle of Son, Boston:—I have derived great benefit from the use of Dr. Wistar's Balsam of Wild Cherry, and have no hesitancy in saying that I have found it to give great relief of cough and pulmonery disease, of which I was some twelve years since so sorely afflicted as to be considered beyond recovery. I therefore take occasion to say that I consider it to be a valuable remedy for Coughs and Consumptive complaints.

MRS. I WEST. Yours, respectfully,

BEWARE OF COUNTERFEITS AND IMITATIONS.

Remember, they imitate in NAME only, without pessessing the virtues-Buy none unless signed "I. BUTTS" on the wrapper.

WISTAR'S BALSAM OF WILD CHERRY

Is prepared by SETH. W. FOWLE & SON, 18 Tremont Street, Boston, and is for sale by all Druggists.

CRACE'S

This Salve is a vegetable preparation, discovered in the 17th century by Dr. WM. GRACE, surgeon in King James' army. Through its agency he cured thousands of most serious sores and wounds, that baffled the skill of the eminent physicians of his day, and was regarded by all as a public benefactor.

GRACE'S CELEBRATED SALVE

Cures in a very short time

CUTS, BURNS, SCALDS, WOUNDS, BRUISES, SPRAINS, ERYSIPELAS, SALT-RHEUM, RING-WORM, CHAPPED HANDS, BOILS, FROZEN LIMBS, FELONS, CHILBLAINS, PILES, CORNS, &c., &c.

It is prompt in action, removes pain at once, and reduces the most angry-looking swellings and inflammations, as if by magle, thus affording relief and a complete cure. ONLY 25 CENTS A BOX.

Seth W. Fowle & Son, Boston, Proprietors.

Sold by Druggists and Dealers generally.

Sold at Wholesale by AVERY, BROWN & CO., HALIFAX.

le Superior to that of Coal Gas, Oil or Fluid.
BERTINE gives a brilliant light, is free from all danger of expl

ALBERTINE gives a brilliant light, is free from all danger of explosion; it does not ignite when a lighted match is placed directly in it, nor waste on exposure to the air, and may be consumed in a Lamp to the last drop within reach of the Wick, without depreciation in the quality of the light. Leading Chemists of London and New York agree that ALBERTINE is destined to supercede all Oils and Burning Fluids as a source of artificial illumination, and the most valuable material for that purpose known.

LAMPS of every description constantly on hand.
